

Sprite Filter Systems

For Softer Hair and Skin

Today, the use of filtered or bottled water to remove chlorine from drinking water is common. But 50% of our daily chlorine exposure occurs in the shower or bath by absorbing through the skin and inhalation of chlorine vapours into the lungs. Protect against dry skin, brittle hair and flaking scalp with a sprite filter.

Scientific studies have linked chlorine exposure to potentially harmful health conditions. Chlorine vaporizes in a hot shower or bath and when inhaled into the lungs, is transferred directly into the blood system. Sprite filters reduce harsh vapours - so you can breathe easier.

WHAT DO SPRITE UNITS REMOVE FROM THE WATER?

- Our Chlorgon filtration media removes:
 - Free Chlorine (Cl⁻)
 - Combined Chlorine (Sodium Hypochlorite)
 - Hydrogen Sulfide (rotten egg smell)
 - Iron oxide (rust water)
 - Dirt, sediment
 - Odors
- Easy to install & replace filters
- Protects Coloured and brittle hair
- Prevents dry skin and wrinkling

Systems available for all shower head types and baths.
